XM CYBER

SIMULATE, VALIDATE & REMEDIATE EVERY HACKER'S PATH TO YOUR CRITICAL ASSETS
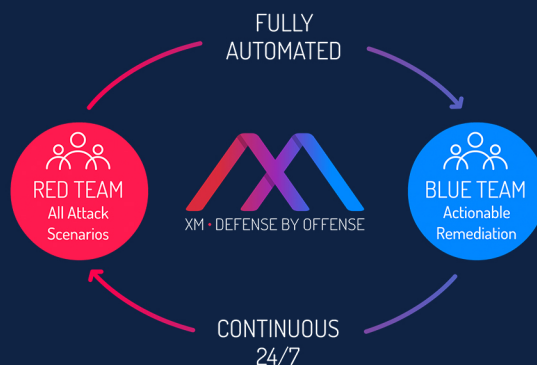

XM · DEFENSE BY OFFENSE®

ARE YOUR CROWN JEWELS REALLY SECURE?

- Hackers capitalize on human errors such as misconfigurations, shadow IT, and lack of awareness
- Hackers employ legitimate tools and user behavior to infiltrate networks and compromise assets
- Organizations are still vulnerable to attacks despite the modern security controls and processes in place

XM CYBER • DEFENSE BY OFFENSE

- Our APT Simulation Platform, HaXM, continuously exposes all attack vectors, from breach point to any organizational critical asset
- The continuous loop of automated red teaming is completed by ongoing and prioritized actionable remediation of security gaps
- The platform addresses real user behavior, poor IT hygiene and security exploits to expose the most critical blind spots
